INTRODUCTION

***The ISF World Schools Orienteering Championship was postponed from June/July 2021 to September 2021 because of the COVID-19 pandemic. Prior to the event's postponement, the Bulletin 1 had already been published. We are hereby sending you the updated Bulletin 1 with the adjusted information in accordance to the current situation.**

ISF World Schools Championships (WSC) are events characterised by a balanced programme between sport and educational content: the balance between sport and education is to create awareness about the role of sport in putting forward topics such as fair play, healthy lifestyle, respect, inclusion. WSC Orienteering is open to the participation of school and selected teams. Beside the name of the respective member, teams will defend the colours and name of the specific school they represent. This format is meant to create a strong identification between the students and the school they attend.

ISF WSC Orienteering is a team competition, with individual events only contributing to the final team result.

Each ISF member may enter the WSC with more than one school team (see below – participation).

School Sport Entities (SSE) or schools from SSE that are not members of the ISF can take a part in ISF events provided that they follow all ISF regulations and that the institutions that wish to enter the event are recognised by an official national or sport authority.

Age categories for WSC's are outlined in their respective sport-specific rules.

The educational programme and the sport format of the event shall always be adapted to the age of participants: in general, in events for lower age categories, the educational content will have a more prominent role.

► a. Maps and terrain description

Maps:

The maps for the Long-distance and Middle-distance races will be drawn according to IOF rules (IOF ISOM map 1: 10.000), with a contour interval of 5 metres. The Long-distance competition will be organised at the mountain Kosmaj (62 km from EC - location) and the Middle-distance competition in the village Babe (53 km from EC - location) the map for the Friendship Team Event will be at a scale of 1 : 4 000 with a contour interval of 2 metres.

The competition maps for the ISF World Schools Orienteering Championship 2021 will be revisions / updates of the IOF maps:

- Long-distance - map Kosmaj - old map
- Middle-distance – map Babe- old map

Terrain description:

The Model Event will be held on same terrain, but in different parts of the overall map. Mapping is done by the same mappers as the competition forest maps; therefore, the Model Event will be ideal to get familiar with how certain features have been mapped. The Model Event will be held in exactly the same way as in the competitions and will have Sport Ident timing. The start and finish layouts will be different both days. The controls will be set out with Sport Ident units and there will be a Sport Ident download at the finish. Thus, this will serve as a full Model event to show what competitors should expect in the coming days.

The Long-distance:

The terrain is mostly deciduous forest with varying densities, from fast to slow runability. The forest has steep slopes with many different terrain features (brown on the map) and a few areas of boulders. There is a good network of forest trails/tracks and paths.

[Old map - link](#)

The Middle-distance:

The area has a flat top with valleys and spurs around the edge. It is mostly deciduous forest, with a little part of coniferous forest. 20 % of the map is open land. The whole area is having very detailed contours because it is an old Roman open mine. So overall, the terrain has many little hills or knolls (from 1m to 3 m high) and little depressions (from 1m to 3 m deep). There is a good network of forest tracks/trails and paths.

Competitors, team officials, and other persons, who through knowledge of the terrain may influence the results of the competitions, are not allowed to enter these embargoed areas.

▶ c. Friendship Team Event

Each team will consist of three competitors from different countries. Each runner will receive a map with all of the controls and the control descriptions before the race. The team will have time before the start to allow planning for their team's route.

The start will be a mass start.

The teams will decide how to share out the controls and which member visits which control.

The winner will be the team that returns to the finish in the shortest time, having visited all the controls. Two obligatory meeting points, manned controls A and B will be marked on the map. At controls A and B, all three team members must meet and punch their e-cards, or control cards, together, at the same time.

The Event will be in a public area where the people of the host town will be able to see a part of the event.

The emphasis of the event shall be on fun and co-operation between the young participants rather than competition. The expected winning time is 35-40 min.

More detailed information on maps and competition areas will be communicated in the 2nd bulletin

4. Anti-doping

Dope testing for the use of banned substances can take place during the competition according to current ISF Anti-Doping Rules.
